Vinyl soft sheen and textured.
250ml and 500ml tins. Contact your local shop for details.

Flemish Bond

This was used where the wall was two bricks thick. Every other brick was turned to show the end giving an extremely strong wall.

Stretcher Bond

This is where the long face of the brick is shown. It would have been used on houses where the wall was one brick thick. And then on modern houses where there is a cavity wall construction.

Herringbone Bond

Herringbone was used to decorate Tudor houses between the timber frames.
